

Ultrafast, Cheap Best webhosting and Reliable Webhosting Solutions

Cheap webhosting, reliable webhosting

Affordable prices, 99.5% uptime, better technical support made us leading web hosting company in the industry. 1stHostings.com receives highest rankings from clients all over the world.

Our hosting packages provide you with a high quality service, which cannot be equaled. The services carry state of the art technology using Dual Pentium III Processors.

Red Hat TM Linux is the traditional web hosting platform that powers web sites on an extremely reliable and robust platform. Our most affordable and reliable hosting packages are UNIX based.

We can offer extra low fees for domain registration - starting from just \$11.95 per year on .com, .net, org, .us, .info

In addition to terrific prices we also offer a number of free services that most registrars charge for: DNS, URL Redirection, Email Forwarding, API, and Parking Services.

Search Engine Optimisation (SEO), improve you Google PR (page ranking)

Don't forget to let us build your website, or improve the ranking of your existsing website, succes, hits and improvement guaranteed ! We have integrated teams taking care of your webdesign, we have scriptwriters and SEO-ers (search engine optimising). In the end everything will be integrated into a very nice looking, fast loading and high ranking website that will attract not only many visitors, but especially the specific visitors that you need to realize more turnover.

So even if you already have a website, but you are not happy with the performance, please let us upgrade it to a good performing website !

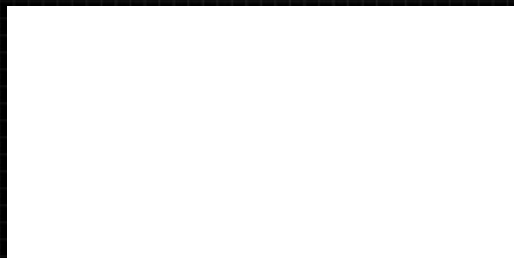

Refreshing and great webdesign with admin panels

We build websites from 1 page to complex websites with databases, interactivity, networking etc.

If you want to own your website and also be able to update it by yourself, we can help you. With every website build we deliver an adminpanel login only for you where you can update content, adjust keywords or metatags, add pages etc. all by yourself, without having to know anything about HTML, programming etc. So, give us your topic, specs for the website and we will make it work for you. Try us !
